PROFILE

I am always in pursuit of new opportunities, projects, and partnerships. Exchanging ideas about technology, software development, and innovation is a great source of excitement for me. By continually expanding my knowledge and experience, I aim to contribute to the world of technology with creative solutions

EXPERIENCE

2023-2024

NGSI - Next Gen Solution & Innovation
Front-end Developer

In my current role, I specialize in front-end development using Nuxt.js (Nuxt 3) to create dynamic, responsive interfaces with server-side rendering. I have primarily focused on developing the front-end for online ordering systems and QR code-based table ordering menus. This involved optimizing user experiences, ensuring seamless integration with backend APIs, and maintaining high performance across various devices and screen sizes.

2023

Weeb Group
Front-end Developer

I developed website features using HTML, CSS, and JavaScript.

2021-2022

Aksiyon Teknoloji
Software Developer

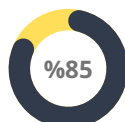

I started with the task of installing and commissioning our image processing software and solving the problems with a remote connection. I worked on RS485 Modbus RTU serial communication. I used Python Pyserial, Tkinter, and PyQt5 library. I developed a desktop application to detect disconnected cameras and notify the user instantly. Also, developed a web application to receive technical requests, manage and store solutions. I use Python's Django library.

2018-2020

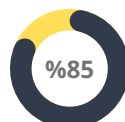

Freelance
Software Developer

Started by developing websites and web applications for clients of a partnered advertising agency. Additionally, wrote scripts for online game platforms and designed logos, banners, and sliders for websites.
